EXPERIENCE

AnyPresence Inc / Nanoscale.io, Reston VA — Solutions Engineering Manager

SEPTEMBER 2014 - PRESENT

- Responsible for the design, production, and delivery of client facing full-stack applications
- Lead an international team of software engineers
- Architect scalable HIPAA & PCI compliant solutions to solve complex use cases for clients
- Implemented many complex security controls for PCI-compliant applications which passed multiple third-party penetration tests

AnyPresence Inc, Reston VA — Technical Consultant

APRIL 2013 - SEPTEMBER 2014

- Work directly with Fortune 500 clients during entire application-development lifecycle
- Design full-stack architecture for mobile applications and oversee projects from sales until completion
- Develop consumer and business-facing applications, as well as server applications and databases
- Built complex projects such as a data-driven product configurator, a content-management system (CMS), a PCI-compliant credit card rewards application, and a HIPAA-compliant medical application

SolutionWorx Inc, Chantilly VA — Software Engineer

JANUARY 2012 - APRIL 2013

- Spearheaded client services department by being the first and only software engineer
- Worked directly with clients and managed all projects
- Built automated reporting system, which pulled and aggregated client network, machine, sales, and support survey data. System emailed customized graphical reports to clients on an employee-defined schedule.
- Designed and created real-time help desk analytics system which displayed relevant charts and information on help desk systems
- Architected and engineered IBM Lotus Notes applications, which spanned multiple databases and servers.

PRNDL Development Studios LLC, Woodbridge VA — President/Co-founder

SEPTEMBER 2010 - DECEMBER 2014

- Started software development company building mobile applications and websites.
- Built and deployed security application with over 10k users
- Managed team of software engineers
